Performance Standards

HOSE LAY - FORWARD LAY - PLUG POSITION

Firefighter: _____ Company/Shift: _____

Benchmarks:

1. Looks both ways before stepping off the apparatus.
2. Looks back and walks away from the truck (does not walk backwards).
3. Waits for supply line to slacken (1-2 couplings) and sets humat valve away from work area.
4. Breaks steamer cap with wrench and places wrench on hydrant stem (does not put hydrant wrench on ground).
5. Opens hydrant to flush debris onto ground, closes hydrant, closes humat valve
6. Opens hydrant all the way by standing behind it after checking to be sure the hose is clamped behind the engine.
7. Straightens kinks near the hydrant
8. Takes hydrant wrench, follows supply line to apparatus straightening any kinks.

Allotted time for this skill: 2 minutes water to engine or clamp

Time: _____ minutes _____ seconds

Evaluator: _____ Date: _____

Performance rating on this standard: PASS _____ FAIL
